

Prof. Dr. Arnaud Dragicevic

Chulalongkorn University, CIRANO

International Faculty Member, Associate Researcher

Prof. Dr. Arnaud Dragicevic is a French economist with interdisciplinary expertise in the bioeconomy, sustainable development, and complex systems. His research lies at the intersection of economic theory, industrial organization, and sustainability transitions, with a particular interest in coordination under uncertainty and complex adaptive systems. He is committed to fostering innovation in the bio-based sector and advancing resilient, sustainable economic models. Over the course of his academic career, Prof. Dr. Dragicevic has authored more than 40 peer-reviewed publications, actively contributed to international research collaborations, and presented his work at numerous academic conferences and seminars worldwide. He has taught at undergraduate, master's, and doctoral levels. He holds a Ph.D. and a habilitation in economic sciences.
